(1) On September 6, 2013, the Company's shareholders approved a 10 for 1 share consolidation of the Company's equity instruments comprised of common shares, warrants and stock options. All equity instrument figures presented herein are on a post-consolidated basis.

(Expressed in Canadian dollars)

1. Nature of operations and going concern

Canoel International Energy Ltd. ("Canoel" or the "Company") was incorporated pursuant to the provisions of the British Columbia Business Corporations Act on September 20, 2007. The address of the Company's registered office is 15th Floor, 850 - 2nd Street S.W., Calgary, Alberta T2P 0R8, Canada. The Company is primarily involved in the exploration for, development of and production of oil and natural gas properties primarily in Argentina.

On September 6, 2013, the Company's shareholders approved a 10 for 1 share consolidation of the Company's equity instruments comprised of common shares, warrants and stock options. All equity instrument figures presented herein are on a post-consolidated basis.

As at September 30, 2013, the Company had not yet achieved profitable operations, has a working capital deficit of $1,294,598 (March 31, 2013 – $3,754,679) and an accumulated deficit of $10,609,790 (March 31, 2013 – $9,913,714) since its inception, and expects to incur further losses in the development of its business. Current cash resources will not be sufficient to continue the exploration and development activities. These matters raise significant doubt about the ability of the Company to continue to meet its obligations as they become due. Continuing operations are dependent on the ability to obtain adequate funding to finance existing operations, and attain future profitable operations in Argentina. Additional financing is subject to the global financial markets and economic conditions, and volatility in the debt and equity markets. These factors have made, and will likely continue to make it challenging to obtain cost effective funding. There is no assurance this capital will be available and if it is not, the Company may be forced to curtail or suspend planned activity.

These consolidated financial statements have been prepared on the basis of the going concern assumption that the Company will be able to discharge its obligations and realize its assets in the normal course of business at the values at which they are carried in these consolidated financial statements, and that the Company will be able to continue its business activities. Realization values may be substantially different from carrying values as shown and these consolidated financial statements do not reflect adjustments that would be necessary if the going concern assumption were not appropriate. If the going concern basis were not appropriate for these consolidated financial statements, then the adjustments would be necessary in the carrying value of assets and liabilities, the reported revenues and expenses, and the balance sheet classifications used. These adjustments could be material.

2. Basis of presentation

These unaudited condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards, including International Accounting Standard 34 – Interim Financial Reporting. The Company has consistently applied the same accounting policies throughout all periods presented except as noted below (Note 3). MOG's working interests in the Assets and has assumed the liability for future plugging, abandonment and site remediation costs associated with the Assets. At the same time, the Company received a cash payment of EUR1,250,000 ($1,701,250) as MOG's contribution toward future abandonment and remediation costs. The Company also received an initial advance of EUR104,000 ($142,200), for a portion of the revenue MOG received from the Assets during the period between the August 24, 2012 effective date of the acquisition and the most recent production statements, net of allowable operating costs, agreed capital expenditure associated with the Assets and certain deposits for future capital expenditures. Additional revenue adjustments up to the final transaction date will be paid to the Company in due time.

6. Prepaid property and equipment insurance

Upon the change of ownership of the Assets acquired in Italy (Note 5), the Company obtained an insurance policy for its Italian oil and gas operations. The policy has a five year term for which the Company paid the total premium of EUR567,300 (C$793,440 at September 30, 2013), of which $56,345 has been recognized as expense, $158,688 is included in current prepaid expenses and the remaining $578,407 balance shown as a long-term asset.

7. Oil share agreement

In connection with a business combination completed in July 2010, the Company became obligated to an oil share agreement pursuant to which, for a period of three years commencing November 30, 2010, the Company will provide Central Argentina with the following: (i) 50% of the annual gross revenue derived from the sale of barrels of oil at a per barrel invoice price that exceeds US$42.00, but is less than or equal to US$52.00; and (ii) 25% of the annual gross revenue derived from the sale of barrels of oil at a per barrel invoice price that exceeds US$52.00.

Accretion of the liability and the effects of revisions to estimates are recognized as royalty expense in the consolidated statement of loss and comprehensive loss.

The following table presents the reconciliation of the carrying amount of the oil share agreement:

Balance – March 31, 2013	$	686,990
Royalty expense		95,789
Foreign currency translation		11,203
Balance – September 30, 2013	$	793,982

On January 20, 2011, the Company obtained a loan from a private lender for US$2,000,000. The loan matures in January 2013. The loan was extended for an additional six months to July 2013. The loan is unsecured and bears interest at the fixed US prime rate of 3.25% plus 6.75%. Payments are interest only on a quarterly basis commencing on April 21, 2011. The Company has agreed to grant security over additional oil and natural gas assets acquired in Argentina, if acquired using the loan proceeds. Subject to regulatory approval, the lender has the right to participate in a portion of the profit from the eventual sale of any such property. As at March 31, 2013, no additional Argentinean properties have been purchased and the loan payable was reported in current liabilities for $2,031,200 plus $89,595 of accrued interest included in trade and other payables.

On June 1, 2013, the Company and the third party lender amended the terms of the US$2,000,000 loan payable as follows:

- Amended principal amount US$2,050,000 representing the original US$2,000,000 principal amount plus US$121,644 of accrued interest up to June 1, 2013 and a US$50,000 arrangement fee in connection with the amendment of the loan payable;

As a result of the amendment, the Company recognized US$121,644 ($126,120) of finance income for the recovery of previously accrued but unpaid interest. The US$50,000 arrangement fee is included in interest expense in the current period.

This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk, and the Company's management of capital. Further quantitative disclosures are included throughout these consolidated financial statements.

a) Credit risk

Credit risk is the risk of an unexpected loss if a customer or counter party to a financial instrument fails to meet its commercial obligations. The Company's maximum credit risk exposure is limited to the carrying amount cash of $896,341 (March 31, 2013 – $346,541) and trade and other receivables of $1,137,457 (March 31, 2013 – $627,892).

There can be no assurance that such financings will be available to the Company.

c) Market Risk

Market risk is the risk that changes in foreign exchange rates, commodity prices, and interest rates will affect the Company's net loss income or the value of financial instruments.

i) Currency risk

Foreign currency exchange risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in foreign exchange rates. Foreign exchange rates to Canadian dollars for the noted dates and periods are as follows:

	Closing rate		Average rate	
			Six months ended September 30	
	September 30 2013	March 31 2013	2013	2012
ARS	0.1775	0.1985	0.1908	0.2272
US dollars	1.0303	1.0137	1.0308	1.0102
Euro	1.3920	1.3071	1.3561	1.2962
Swiss Franc	1.1375	1.0748	1.1003	1.0789

The following represents the estimated impact on net loss and equity. This analysis is based on foreign currency exchange rate variances that the Company considered reasonably possible for six months ended September 30, 2013 and 2012. All other variables such as interest rate are held constant. There have been no changes in the method of calculating the sensitivity to change in foreign exchange rates.

	2013 (Increase) Decrease			2012 (Increase) Decrease		
	Rate change	Net loss	Equity	Rate change	Net loss	Equity
ARS	11%	–	137,730	5%	–	105,570
US dollars	2%	(56,000)	(11,780)	6%	115,385	(56,004)
Euro	6%	22,070	6,840	3%		
Swiss Franc	6%	(71,650)	–	11%	127,651	–
		(105,580)	132,790		243,036	49,566

i) Commodity price risk

Commodity price risk is the risk that the fair value of future cash flows will fluctuate as a result of changes in commodity prices.

A 5% change in the price of natural gas produced in Italy would have a nominal effect on the Company's net loss for the three and six months ended September 30, 2013.

Oil prices in Argentina are the results of complicated formulas that are set by refineries based on instructions or decrees from the government and crude oil prices in Argentina are capped by the Government at variable levels. From early 2010, the price has gradually increased from US$42.00 per barrel to US$63.00 per barrel at March 31, 2012, US$60 per barrel at March 31, 2013 and US$61 per barrel at September 30, 2013. As at September 30, 2013, a 5% change in the price of oil would represent a change in net loss for the three and six months ended September 30, 2013 of approximately $52,300 and $89,000, respectively.

ii) Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company has fixed interest on notes payable (Note 8) and loan payable (Note 9) and convertible notes (Note 11).

22. Operating segments

The Company's operations are conducted in one business sector, the oil and natural gas industry. Geographical areas are used to identify Company's reportable segments. A geographic segment is considered a reportable segment once its activities are regularly reviewed by the Company's management. The Company has three reportable segments which are as follows:

- Argentina;
- Italy, which commenced oil and gas operations following the acquisition of assets in June 2013 (Note 5); and
- Other, which includes corporate assets and the operations in the Canadian and US entities. None of these individual segments meet the quantitative thresholds for determining reportable segments in the three and six months ended September 30, 2013 or 2012.
